

EUROPEAN LANGUAGE GRID

ELG: Technological Multilingualism in Austria

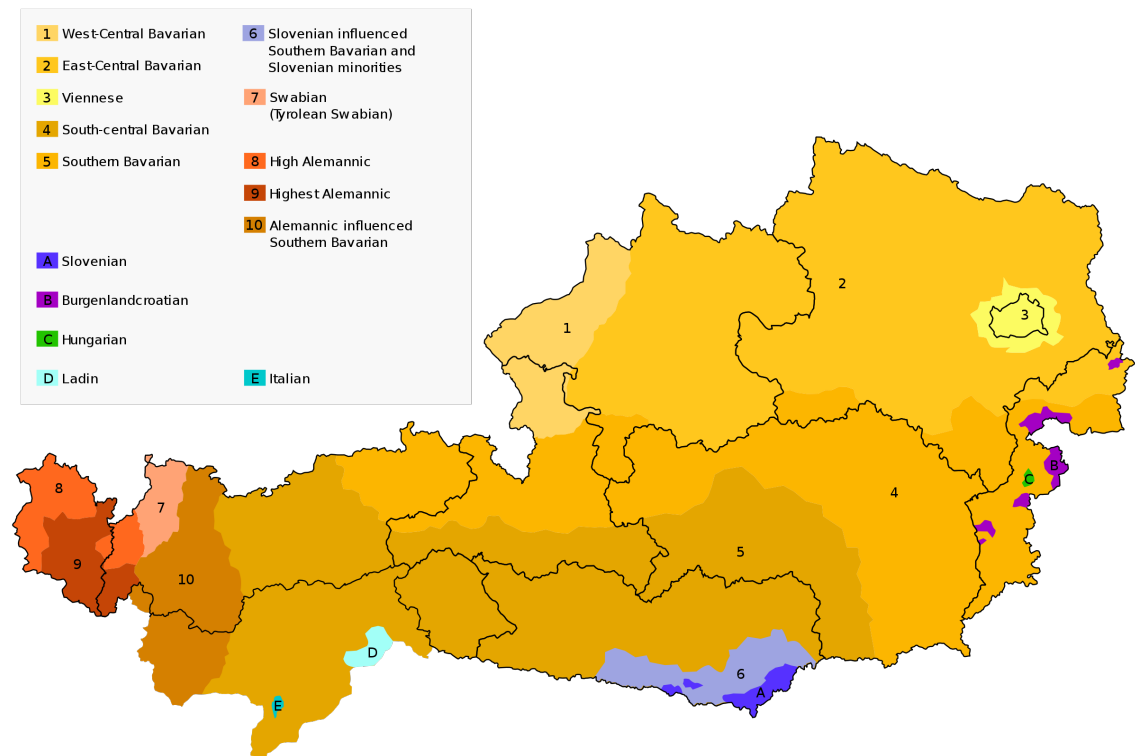

Dagmar Gromann (Centre for Translation Studies, University of Vienna) - NCC Austria
dagmar.gromann@univie.ac.at

23-06-2020 1st Regional ELG Workshop: Switzerland, Austria, Germany –Zürich, Switzerland (virtual workshop)
<http://www.european-language-grid.eu>

Austrian German

- Standard Austrian German:
 - pronunciation: consonant weakening, e.g. backen (to bake) and packen (to pack)
 - grammar: different use of cases (Dative vs. Genetiv), perfect tense rather than past tense, prepositions, etc.
 - terminology: different use of terminology, e.g. foreclosure law: “Zwangsvollstreckungsrecht” (de-DE), “Exekutionsrecht” (de-AT), and “Schuldbetreibungs- und Konkursrecht” (de-CH)

Austrian dialects:

Source: https://en.wikipedia.org/wiki/Languages_of_Austria#/media/File:Languages_Austria.svg

Protocol No 10 on the use of specific Austrian terms of the German language in the framework of the European Union

- Beiried (rump steak)
- Eierschwammerl (chanterelle)
- Erdäpfel (potatoes)
- Faschiertes (minced meat)
- Fisolen (green bean)
- Grammeln (greaves)
- Hüferl (haunch)
- Karfiol (cauliflower)
- Kohlsprossen (Brussels sprouts)
- Kren (horseradish)
- Lungenbraten (filet)
- Marillen (apricot)
- Melanzani (eggplant)
- Nuß (thick flank)
- Obers (cream)
- Paradeiser (tomatoes)
- Powidl (plum jam)
- Ribisel (currant)
- Rostbraten (roast joint)
- Schlögel (leg/haunch)
- Topfen (curd)
- Vogerlsalat (lamb's lettuce)
- Weichseln (sour cherries)

Digital language extinction

- Austrian German:
 - **dialects:** very limited availability of sound recordings of different dialects over the past 100 years and few written records (few exceptions: e.g. [“German in Austria” \(F60\)](#), [Austrian Academy of Science Initiatives](#), [GRASS corpus](#) of conversational speech of TU Graz)
 - **standard:** limited availability of structured, annotated language corpora or resources of Austrian German; considerable terminological differences
- Officially acknowledged linguistic minorities in Austria: (Burgenland) Croatian, Slovenian, Hungarian, Czech, Slovak, Romani; Austrian Sign Language often mentioned in this context
 - [European Charter for Regional or Minority Languages](#) - use in education and media; use in legal and administrative contexts is permitted and encouraged
 - mostly regulated on a regional basis and little harmonization, e.g. right for first language education only granted in specific regions
 - little digitalization efforts

Top-15 nationalities living in Austria (status: 2018)

Language technology and language-centric AI in Austria

Universities & Educational Institutions

Language & Text

Language technology and language-centric AI in Austria

- speech technologies, e.g. [SAIL Labs](#), Signal Processing and Speech Communication Laboratory (SPSC Lab) TU Graz, and conversational AI, e.g. [WienBot](#) (digital assistant of the city of Vienna), [Ondewo](#)
- text-to-speech (TTS) voices in Standard Austrian German, e.g. [CereProc](#)
- terminologies, e.g. [language resource portal](#) on administrative terminology in collaboration with the Austrian Federal Ministry of Defence
- semantic search, e.g. [Semantic Web Company](#)
- machine translation, e.g. [Kaleidoscope](#), CEF at [EU Council Presidency Translator](#) for the Austrian EU presidency in 2018
- language technology in active and assisted learning, e.g. [WAALTeR](#)
- general and language-centric AI, e.g. [enliteAI](#)
- corpus generation and maintenance, e.g. [Austrian Centre for Digital Humanities](#)

Servus! How can I help?

Some of these texts are automatically translated by an AI and may contain errors - but we are constantly improving the translations! 🤖

Sorry, I don't know where you are, try something like coming from Schwedenplatz to Westbahnhof.

The best way is to take the U1 to Kaisermühlen-VIC, then take the 92A to Schüttauplatz, and then walk to your arrival point. (lido "goose pimples")

Schwedenplatz → zum Ankunftsart

33 Minuten

20:35 Schwedenplatz

U1 → Leopoldau

Kaisermühlen-VIC 20:41

20:45 Kaisermühlen-VIC U

92A → Zachgasse

Schüttauplatz 20:50

20:50 Schüttauplatz

→ zum Ankunftsart

zum Ankunftsart 21:08

→ 33 Minuten

20:35 U1 92A 21:08

→ 35 Minuten

20:45 U1 92A 21:20

wie komme ich ins Gänsehäufel

Wie komme ich vom Schwedenplatz zum Gänsehäufel

AI jobs by sector (October 2018)

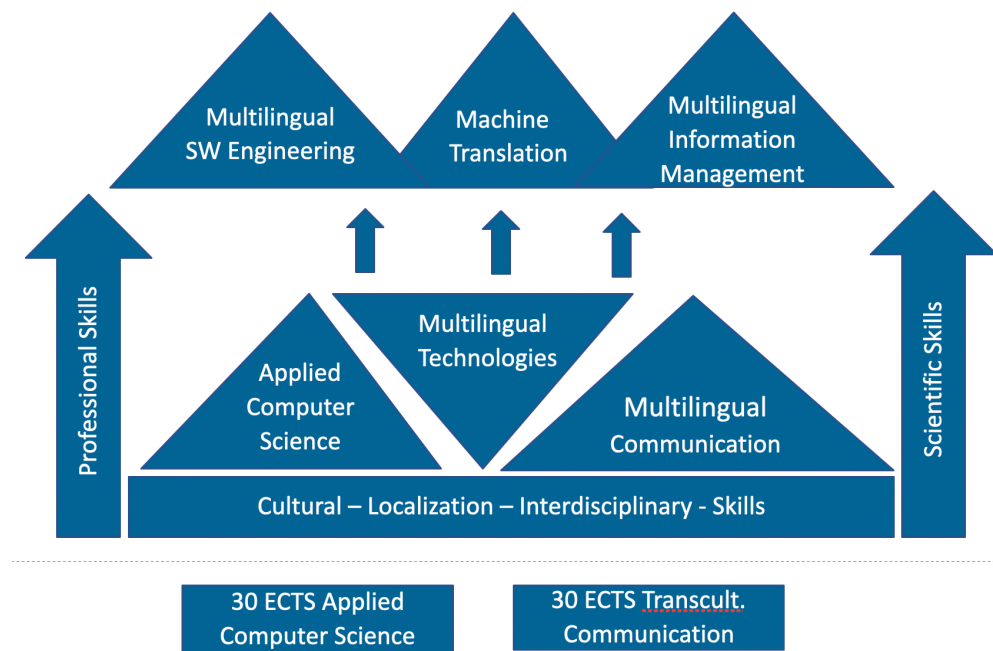

- Information and communication technologies (32%): including business intelligence, market development, consulting, etc.
- manufacturing (30%): mainly data processor development, pharmaceuticals, metal industry
- scientific and technical services (15%)

Education programs

- Computational linguistics and language technologies are taught at several
 - Viennese, e.g. Centre for Translation Studies,
 - Carinthian, e.g. Applied University Klagenfurt (Communication Engineer), and
 - Styrian universities, e.g. SPSC Lab TU Graz
- New master program of Centre of Translation Studies, University of Vienna and the University of Applied Sciences FH Campus Wien starting winter 2022:
 - Master program [Multilingual Technologies](#) ([curriculum](#) already available)

Political Strategies

- Austria is home to the [European Centre for Modern Languages \(ECML\)](#), located in Graz: national strategies and policies
- [Austrian language competence centre \(ÖSZ\)](#), located in Graz: new media, learning materials, minority language support, teacher training, etc.
- [Austrian language committee ÖSKO \(Österreichisches Sprachenkomitee\)](#): strategies for multilingualism and linguistic diversity
- AI Strategy Austria: [Austrian Intelligence Mission Austria 2030 \(AIM AT 2030\)](#) and the [Austrian Council on Robotics and Artificial Intelligence](#) (ACRAI)
- [Digital Austria](#): focused on digital services

Language Technology Initiatives

- No specific strategy directly geared towards language technology
- AI Strategy Austria: [Austrian Intelligence Mission Austria 2030 \(AIM AT 2030\)](#)
- [AI in Austria](#): independent think tank
- “Private” initiatives: NLP MeetUp, Deep learning MeetUp
- Research projects:
 - “German in Austria (DiÖ). Variation - Contact - Perception” by University of Vienna has recently been extended to 2023, however, little relation to technology
 - “Cross-layer language models for conversational speech” by Speech Communication Laboratory (SPSC Lab) TU Graz, and conversational AI (start 2019): improve speech recognition of spontaneous speech in Austrian German
 - ...

Funding situation in Austria

- From 2012 to 2017: 349,9 Mio. invested into AI
- Federal Ministry for Transport, Innovation and Technology, Federal Ministry for Digital and Economic Affairs: [Artificial Intelligence Mission Austria \(2030\)](#)
 - High-level: few details available; “systems that understand human language (such as automatic translators)” mentioned as application area
- Federal Ministry for Digital and Economic Affairs:
 - [Digital Austria](#): digital services mostly
- Vienna Science and Technology Fund (WWTF)
 - [Digital Humanism](#) call - human-centered innovation
- Austrian Research Promotion Agency (FFG)

Source: <https://www.bmk.gv.at/themen/innovation/publikationen/ikt/ai/aimat.html>

Take-home message

- More digitalization effort needed for Austrian German and linguistic minorities in Austria
- Current AI initiatives only marginally focus on language technology - difficulty of obtaining funding for related projects
- Major change since META-NET whitepaper:
 - Master program on “Multilingual Technologies”
 - More industry activity in language-centric AI
 - More jobs in the field in Austria

European Language Grid

Thank you!

The European Language Grid has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement № 825627 (ELG).
