Funding: Innovation and Networks Executive Agency (INEA). Department C - Connecting Europe Facility (CEF)

Project duration: June 1, 2020 - June 1, 2022. 24 months

Main key words: Terminology, Database, Network, Infrastructure, Data, Software, Customizable, Public, EuroTermBank, Synchronise, Linked, Central, Nodes.

Background of the research topic: eurotermbank.com, eTranslation TermBank

Goal of the project: Establishing terminology data infrastructure for creation, management and sharing of terminology resources by developing open FedTerm software toolkit to enable organizations and institutions to locally deploy interlinked and synchronized FedTerm nodes connected in a federated network of terminology portals EuroTermBank federated network.

Project abstract: Federated eTranslation TermBank Network aims at facilitating the provision of language tools, and in particular to CEF AT through ELRC-SHARE. The objective is to develop the open FedTerm software toolkit to enable organizations and institutions to locally deploy interlinked and synchronized FedTerm nodes. The federated nodes will be linked to the central federated node – EuroTermBank federated network and regularly synchronise terminology/collections changes.
