LANGUAGE MANAGEMENT

# LSDISCO - Lingsoft Solutions as Distributable Containers

- We provide access to our speech and language technology tools through ELG to organisations and companies with language needs for the Nordic languages
- Our solutions easily distributable with scalable integration in other environments and solutions
- Available both for commercial and non-commercial usage

LANGUAGE MANAGEMENT

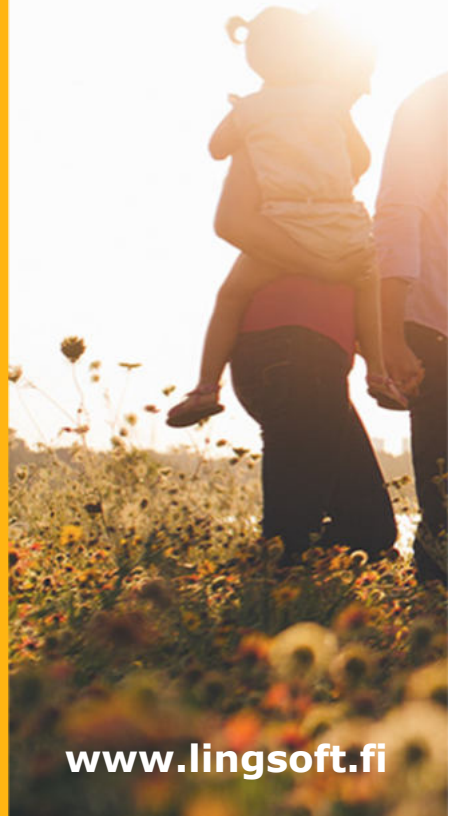
# Project results

- Lingsoft's language technology available on ELG (a total of 35 services)
- Creation of language technology pages on Lingsoft's homepages, also describing the ELG project
- We have presented the ELG project and platform as part of presentations at trade shows, conferences, and specific customers

Lingsoft®
LANGUAGE MANAGEMENT



# Business plans

- Lingsoft has an existing NLP SaaS business and infrastructure
- ELG represents a new and additional sales channel as part of our SaaS business
- Especially for customers and countries outside of the Nordics where Lingsoft is not as well known (yet)
- Serve our customers through the distribution channel they prefer

# Future plans

- ELG as a central and essential channel for our solutions and services in the future
- Continuous improvement of our ELG services
- New language services as we continue to develop them (eg. speaker diarization and subtitling; new languages)
- Leveraging of tools available from ELG in our production processes

# Conclusions

- ELG has made it possible for us to upgrade our service infrastructure for easier distribution
- ELG provides a simple way for us to demonstrate our services to new users
- We will make use of other providers' ELG resources and services for our benefit, especially the open source data resources
