

John P. McCrae

research and innovation programme under grant agreement No 825182

Objective 1 - Multilingual cross-sectoral data access

Data discovery tools aggregated from multiple sources

Deduce probable licenses from complex pipelines

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 825182

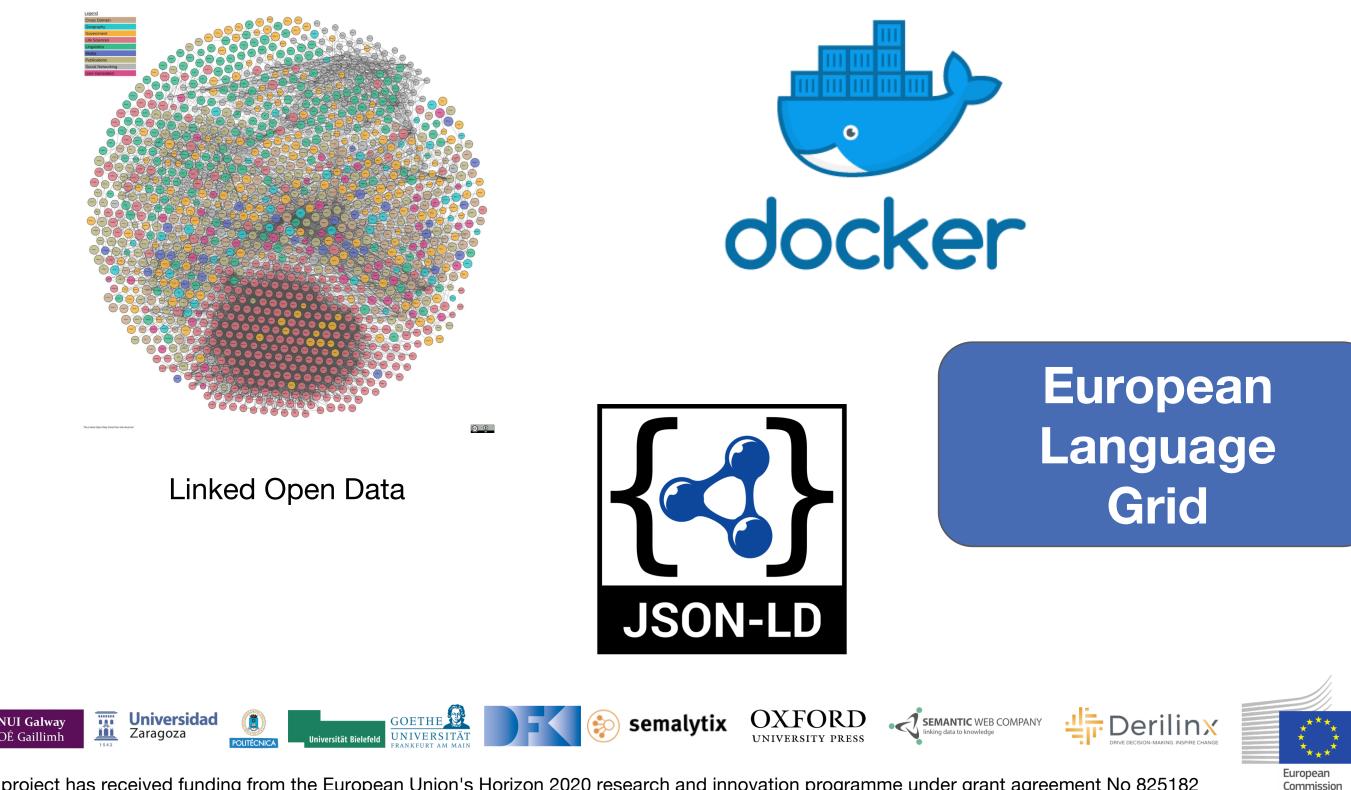

Objective 2 - Interoperable language technology

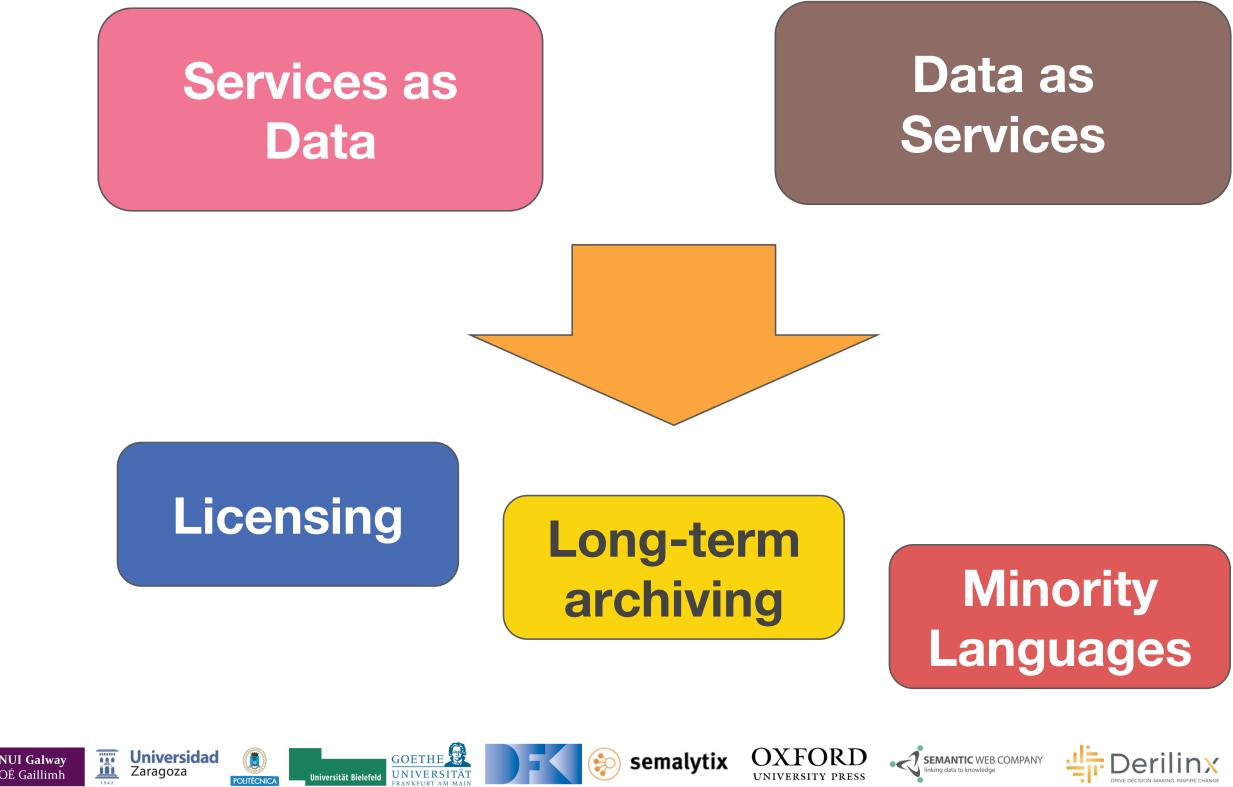

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 825182

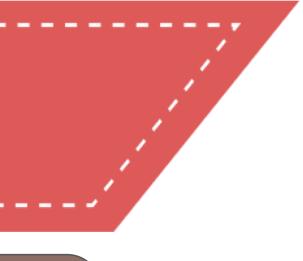

Objective 3 - Sustainability of language technologies/resources

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 825182

Pilot I: Multilingual Knowledge Graphs for **Knowledge Management across Sectors**

OXFORD UNIVERSITY PRESS

Pilot II: Linking lexical knowledge to facilitate rapid integration and wider application of lexicographic resources

Pilot III: Supporting the development of crossborder public services in open government

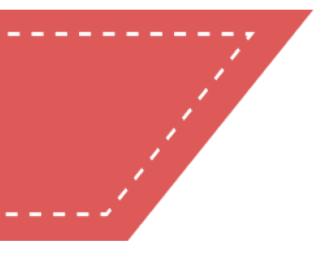

Pilot IV: Multilingual Text Analytics for Extracting Real-World Evidence in the Pharma Sector

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 825182

for technology companies

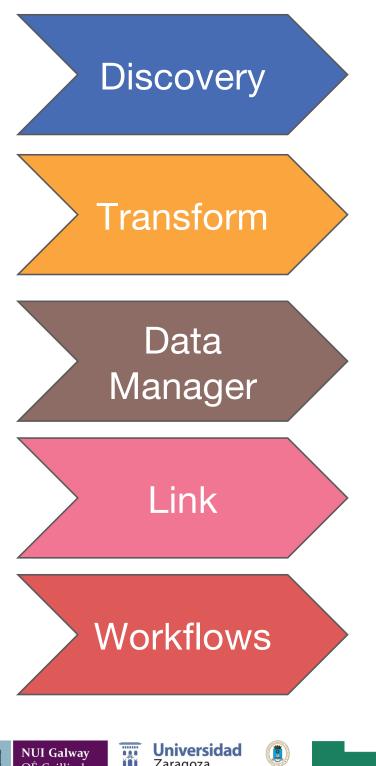

Commission

Tools

Search and discovery of datasets by aggregating multiple sources

Transformation of non-RDF sources to RDF standards

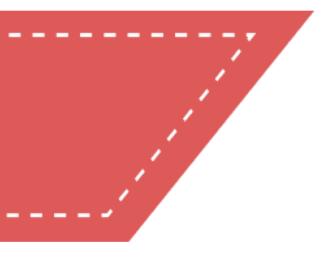

Smart contracts for composing licenses

Semi-automatic linking of datasets

Workflows for portable and scalable technologies using containerization
